Red Team Reconnaissance Report

Automation Tool Kit

Target: example.com
Scan ID: 11
Scan Date: 2026-01-25 03:51:18

Executive Summary

This report presents the results of an automated reconnaissance assessment conducted on the specified target. The objective of this assessment was to identify publicly exposed services and infrastructure without exploiting the target.

Overall Risk Level: **LOW**

Risk Score: 1 / 10

Risk Assessment Overview

The risk level is derived based on exposed services, open network ports, and accessible resources identified during reconnaissance.

- **LOW (0–2):** Minimal exposure
- **MEDIUM (3–5):** Moderate exposure
- **HIGH (6+):** Significant exposure

Security Observations & Recommendations

Observations:

- Multiple services may be exposed to the public internet.
- Open ports increase the external attack surface.

Recommendations:

- Restrict unnecessary open ports.
- Apply firewall and access control rules.
- Conduct periodic security assessments.

Ethical Disclaimer

This reconnaissance activity was conducted strictly for educational and authorized security assessment purposes. No exploitation or intrusive actions were performed.
